Bachelor of Science in Software Engineering
Burapha University
Thailand | 2017–2021

TECHNICAL SKILLS :
Programming
Flutter • Dart • Next.js • TypeScript • Go • Python • Kotlin •
SQL • SQLite • PostgreSQL • Firebase • Docker

If your company is looking for someone who goes beyond simply meeting requirements and cares about every aspect of a product—from user experience and system quality to long-term growth—I believe I can bring a mindset of striving for perfection and never overlooking the small details. I always aim to build high-quality products and continuously improve them to meet international standards.

WORK EXPERIENCE :

Mobile Developer / Full Stack Developer
Zenith Comp Co., Ltd ***Bangkok, Thailand | 09/2025 – 08/2026 (Contract ended - Workload ended)***

- Architected and delivered an offline-first Flutter iPad application for a government meeting system deployed across 50 devices, featuring two-way synchronization, real-time WebSocket communication, automatic data reconciliation, and automated testing/CI.
- Designed the application's security architecture with AES-256-GCM encryption, secure key management, device integrity checks, encrypted PDFs, dynamic watermarking, and fail-closed access controls.
- Designed and built the SWU AI Platform administration system across database, backend, and frontend layers, including LDAP integration, normalized RBAC architecture, scalable APIs, and user management.

Mobile Team Lead / Developer
LearnCloud Co., Ltd. ***Bangkok, Thailand | 01/2024 – 08/2025 (Company closed)***

- Built aiLearn's core Flutter application from the ground up, delivering complex exam and adaptive-learning workflows, real-time AI explanations, performance visualization, and In-App Purchase.
- Led a 3-person junior mobile team while remaining primarily hands-on, planning development, breaking down requirements, assigning work, guiding implementation, and handling debugging and multi-environment deployments.
- Worked across product, design, AI, backend, and DevOps teams to shape features, define data and API requirements, and translate product concepts into practical technical solutions.

Mobile Developer
MyOrder Marketing Co., Ltd. ***Chon Buri, Thailand | 05/2023 – 12/2023***

- Built MyPinmall, a Flutter/Riverpod group-buying marketplace, and enhanced My Order, a React Native/TypeScript ordering application, delivering core commerce features while improving maintainability through modular models, reusable components, UI separation, and custom hooks.

Mobile Developer
Minerta Technology Co., Ltd. ***Bangkok, Thailand | 09/2021 – 04/2023***

- Developed mobile and web products across Flutter, React Native, and Nuxt—including a real-time drone tracking application—while serving as the primary frontend/mobile developer alongside a 5-person backend team and supporting junior developers with technical problem-solving.

PERSONAL PROJECTS :

AI API Platform & Developer Console ***[In Development]***
Go, Gin, PostgreSQL, Redis, Next.js, TypeScript, Stripe, Docker

- Built an OpenAI-compatible multi-provider AI gateway with streaming, API key/team management, usage analytics, rate limiting, and credit-based Stripe billing.

AI Chat & Productivity Workspace ***[In Development]***
Next.js, TypeScript, Stripe, PostgreSQL, Python, Fast Api

- Developed a fully offline voice interpreter combining on-device speech recognition, LLM inference, and synthesis.
